

MongoDB Exercise 4 for Dec 2020 batch

- Download the stocks.json file (uploaded along with the course material).
- Run the following mongoimport command to create a collection named **stocks** in a database **stockmarket** with 6756 records.

```
mongoimport --db stockmarket --collection stocks --file stocks.json
```

- Find all the stocks where the profit is over 0.5
- Find all the stocks with negative growth

.
